

Celeritas UAV

Celeritas was a personal project undertaken by a small, dedicated team between June and September 2025. The sole objective was ambitious yet singularly focused: to design, manufacture, and test a fully operational airframe built for one purpose only—pure speed. The exercise served as both a technical challenge and a creative exploration, pushing the boundaries of what could be achieved within a short timeframe and limited resources.

Group members:

- Ashton Hill
- Ted Finn
- Thom Clark
- Will Johnson
- Inesh Sagar
- Max Roche-Kuroda
